Hair Sample Collection

1) Please select 40 hairs from the switch/brush/tail of the animal.
2) Make sure they are clean and dry.
3) Wrap the hairs around your finger or another object such as a pencil and pull with a rapid, sharp motion.
4) Make sure there are hooked or bulbous hair roots visible on the hair.
5) Place sample hair roots onto white card.
6) Peel the instruction sheet off clean adhesive plastic.

7) Seal by pressing clear adhesive firmly over sample.
8) Trim excess hair collected.
9) Return to:
